A: Paste content as plain text in summernote editor
After v0.7.0, every callbacks should be wrapped by callbacks object. <http://summernote.org/deep-dive/#callbacks> So if you are using **summernote** from v0.7.0 or above, jcuend's answer could now ... be rewritten as: `$('#summernote').summernote({ callbacks: { onPaste: function (e) { var bufferText = ((e.originalEvent || e).clipboardData || window.clipboardData ...`

A: jQuery Summernote - Get text back into editor
Since v0.7.0 `code()` has been deprecated and removed (same story for `destroy()` method). You must use `$("#summernote").summernote("code", "your text");` Reference: <http://summernote.org/getting...>

↓ Weird bug ever: http://hackerwins.github.io/summernote/edit_fly.html

The letter "y" doesn't show up when I type it in the example... All other keyboard buttons seem to work fine. And yes, my y button is working fine.

Same issue with the editor on the main page: <http://hackerwins.github.io/summernote/>

Just me?

Can't type the letter "y" #12

 **Closed** Jakobud opened this issue on Jul 15, 2013 · 3 comments

Jakobud commented on Jul 15, 2013

Weird bug. When I type, the letter "y" is ignored. See any of the samples here:

<http://hackerwins.github.io/summernote/>

And this

(http://www.reddit.com/r/jquery/comments/1ibjc/super_simple_wysiwyg_editor_on_bootstrap/cb2vnb2) confirms that I'm not the only one.

lqez commented on Jul 15, 2013

It looks like <https://github.com/HackerWins/summernote/blob/master/summernote.js#L661> may affect on this issue. But I'm not sure.

이건! First follower

친구 이걸 인터네셔널 프로젝트야.

kyeolee commented on Sep 25

이미지 타입에 대해서는 paste를 disable하고 싶은데,

```
var bufferText = ((e.originalEvent || e).clipboardData || window.clipboardData).getData('Text');
var bufferHtml = ((e.originalEvent || e).clipboardData || window.clipboardData).getData('text/html');

if(!bufferText && !bufferHtml) {
  // Image
}
```

해당 로직으로 onPaste 안에서 Image는 판단 가능할거 같은데, 그 이후 disable 처리가 가능한지 여쭙습니다.

위의 방법이 아니어도 optional로 처리할 수 있는지도 알고 싶습니다,

dandv commented on Sep 29

Can we please use English? summernote has become an international project. Thanks :)

lqez commented on Sep 30

Owner

Agree with @dandv :)

I want to disable paste event for image types,

```
var bufferText = ((e.originalEvent || e).clipboardData || window.clipboardData).getData('Text');
var bufferHtml = ((e.originalEvent || e).clipboardData || window.clipboardData).getData('text/html');

if(!bufferText && !bufferHtml) {
  // Image
}
```

I think that identifying the type of pasted items can be done by above code, but I'm not sure whether it could prevent event firing after it.

Or, can I handle this by optional configuration?

lqez added the **needs help** label on Sep 30
